

Dr. Greg Zilberbrant

Before starting his consulting firm, Dr. Zilberbrant spent over ten years in various sustainability-focused, technical, managerial, and strategic corporate roles. Since then, he has worked with clients in energy, waste, and primary manufacturing, focusing on creating value through effective sustainability strategies, environmental management, and stakeholder engagement.

Since 2013, he has been involved in developing and delivering sustainability courses both at the undergraduate and graduate levels. He is the program lead for the Circular Economy and Climate Change program for McMaster University's Certificate of Completion program. This novel program launched the first university-level professional Circular Economy training program in Canada and the Sustainable Infrastructure professional courses in 2021.
